

Python Interview Questions & Answers

1. What is Python?

Python is a high-level, interpreted, object-oriented programming language.

2. Features of Python?

Easy to learn, interpreted, open-source, platform independent, object-oriented.

3. Compiler vs Interpreter?

Compiler converts whole code at once. Interpreter executes line by line.

4. What are Variables?

Variables are containers used to store data values.

5. What are Data Types?

int, float, str, bool, list, tuple, set, dict.

6. List vs Tuple?

List is mutable; Tuple is immutable.

7. What is a List?

An ordered and mutable collection.

8. What is a Tuple?

An ordered and immutable collection.

9. What is a Set?

An unordered collection of unique values.

10. What is a Dictionary?

Stores data in key-value pairs.

11. What is Indexing?

Accessing elements using position.

12. What is Slicing?

Extracting a portion of a sequence.

13. Difference between == and is?

== compares values; is compares memory locations.

14. What are Operators?

Arithmetic, Comparison, Assignment, Logical, Membership, Identity.

15. What are Conditional Statements?

if, elif, else.

16. What is a Loop?

Used to execute code repeatedly.

17. What is range()?

Generates a sequence of numbers.

18. What is a Function?

Reusable block of code.

19. What is return?

Returns a value from a function.

20. Difference between return and print?

return sends value back; print displays output.
